**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-3, drawn to the waterproof moisture permeable cloth, classified in class 442, subclass 76+.
  - II. Claim 4 is drawn to the method of making an article from the cloth of group 1, classified in class 156 in various subclasses. The inventions are distinct, each from the other because of the following reasons:
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the adhesive could be coextruded with the fabric layer and formed as a composite prior to any cutting or sewing and then formulated into any desired article of clothing.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Andrew Chu on 06/27/2003 to request an oral election to the above restriction requirement, but did not result in an election being made, as Applicant has to get confirmation from Korea on the election of the claims.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
